

CLOUD DIRECT

Access Backup and Collaboration

Secure cloud computing designed for your business

Cloud Direct : ABC brings the power of the cloud straight to your business. Its easy-to-use, intuitive dashboard enables you to access and share files with your team from any device, anywhere – giving you the flexibility you need at a price you can afford.

With support for over 800 mobile devices – including iPhone, iPad, Android and BlackBerry – and trusted by over 70,000 organisations, our industry-leading solutions give you the versatility you need for more productive, collaborative working.

Teams can work together in real-time on projects, or offline with synchronisation technology. Automatic versioning and backup keeps files protected. Simple interfaces allow projects to be easily controlled and ensure only the right people have access to information.

By better managing their time and tasks, Cloud Direct : ABC helps your business improve performance while achieving a better work/life balance.

“...Let me just say how impressed I’ve been with the support from your team...”

– Richard Williams, The Premier Group

Cloud Direct : ABC offers you

Uncompromising security

HIPAA-compliant security features are twice the industry standard.

Seamless teamwork

Important information can be shared with colleagues immediately.

Instant accessibility

Files can be accessed from any mobile device, anytime, anywhere.

Next-generation backup with continual protection

Intuitive desktop and web interfaces make selecting, finding and retrieving data quick and easy – while continual backup and bandwidth control keeps all processes seamless and secure.

Anytime, anywhere data access

View and edit your documents from any device – PCs, Macs and over 800 mobile devices including iPhone, iPad and Android – and wave goodbye to the need to email files or links.

Comprehensive file sharing

Safely manage, organise and share files and documents with your team from any device, anywhere. Create projects, control who gets to view or edit files, and save synchronised changes back to project folders for collective team use.

Intuitive, personalised dashboard

View all your recent project activities on one integrated dashboard. Instantly and securely view files, automatically list team comments and changes chronologically, and make favoured files available on your mobile devices even when no connection is available.

Enhanced mobile working

Our range of powerful features is fully compatible with all major smartphones including iPhone, Android, Blackberry and others. Patented rendering technology allows you to view over 40 different document types on your smart device in seconds, without having to download anything.

Simplified management

Manage your teams centrally – whether internal members or external company connections. Our service makes it easy for you to assign people to projects, grant or restrict access rights or view changes by person, project or action.

Seamless synchronisation

A folder called 'My Projects' copies all your projects and stores them safely and locally. Work on them offline, and when you go online again your files will automatically be synced. What's more, other team members are notified when the project is updated.

Real-time collaboration

Maximise team productivity and efficiency by working together on projects. When a comment or change is posted, all relevant team members are notified via email or SMS so they can respond immediately.

Multiple file versions

Use built-in file versioning to instantly recover files and restore them to their original location, either one file at a time or as an entire folder. You never need to worry about losing files again.

"...This is so refreshing and I thank you very much"

– Graham Port, Enhanced Control Systems

About Cloud Direct

Cloud Direct is a world-class provider of affordable enterprise-class IT solutions.

By combining cloud-based technologies with award-winning extra-mile service, we'll help you transform your operations. You can then look forward to increasing productivity, assured business continuity and having the time to focus on business and growth.
